

Amazon PPC Glossary

Amazon PPC Manager Training Program v2026

Fundamentals

Term	Definition
ASIN	Amazon Standard Identification Number; unique ID for each product. Ads always point to an ASIN.
SKU	Internal stock ID used by the seller; visible in reports but ads still connect to ASINs.
Buy Box	The main "Add to Cart" / "Buy Now" area on a product page. Required for Sponsored Products to show.
FBA	Fulfilled by Amazon - Amazon stores and ships the product. Usually better delivery and higher conversion.
FBM	Fulfilled by Merchant - the seller ships themselves. Can be slower and convert worse.
Brand Registry	Amazon's program that gives brand owners enhanced tools. Required for Sponsored Brands and Sponsored Brands Video.
BSR	Best Sellers Rank - Amazon's hourly ranking of how well a product sells in its category. Higher ad rank = better position.
A9 Algorithm	Amazon's search ranking algorithm. Weighs sales velocity, relevance, price, and availability.

Ad Types

Term	Definition
Sponsored Products (SP)	Single-product ads that show in search results and on product pages. Main performance driver.
Sponsored Brands (SB)	Banner ads at the top of search results showing logo, headline, and multiple products. Requires Brand Registry.
Sponsored Brands Video (SBV)	15-30 second video placements. Product shown in first 1-3 seconds. Requires Brand Registry.
Sponsored Display (SD)	Ads for retargeting viewers and showing on competitor product pages. Good for conquering.
Sponsored TV	Upper-funnel video ads on Fire TV / Prime Video. Mostly for larger brands with bigger budgets.

Metrics

Term	Definition
Impressions	How many times your ad was shown.
Clicks	How many times people clicked your ad.
CTR	Click-Through Rate = Clicks / Impressions x 100. Measures ad attractiveness/relevance.
CPC	Cost Per Click = Ad Spend / Clicks. Average cost of each click.
CVR	Conversion Rate = Orders / Clicks x 100. How good the listing is at turning clicks into orders.
ACoS	Advertising Cost of Sales = Ad Spend / Ad Sales x 100. Lower is more efficient.

ROAS	Return on Ad Spend = Ad Sales / Ad Spend. Higher is better.
TACoS	Total ACoS = Ad Spend / Total Revenue x 100. Shows ad impact on entire business.

Strategy

Term	Definition
Auto Match	Amazon decides where to show your ads based on your listing. Great for discovery.
Broad Match	Shows for variations, synonyms, and related searches. Good for exploring.
Phrase Match	Search must include your keyword phrase in the same order, words can be added.
Exact Match	Only triggers for that exact keyword or very close variations. Best for hero keywords.
Negative Keyword	A keyword you tell Amazon NOT to trigger your ad for. Stops wasted spend.
ASIN Targeting	Targeting specific competitor or complementary ASINs. Use when your offer is stronger.
Dynamic Down Only	Bid strategy where Amazon can only lower bids. Best for untested keywords.
Dynamic Up & Down	Bid strategy where Amazon can raise and lower bids. For proven keywords.
Placement Multiplier	Adjusts bids for specific placements (e.g. more aggressive at top of search).
Harvesting	Finding converting search terms in Auto/Broad reports and moving them to Phrase/Exact.
Conquesting	Placing your ads on competitor product pages to win their shoppers.
Hero Keyword	A proven, profitable keyword placed in Exact match Hero campaigns for maximum control.
